

A Global Shield Solutions' Company

The Technology: Electrostatic spray technology, EST, works by creating an electrically charged mist that clings to and wraps around a surface. The EST process results in complete surface coverage and allows cleaning and sanitizing products to reach hard to get places, while using less product compared to conventional trigger sprayers. Additional savings are achieved by reducing labor costs and the flexibility of a truly portable device. The SD 200 can be used on hard and soft surfaces, and outperforms traditional sprayers and foggers at an economical price point.

Precise Chemical Application with Cordless Convenience

Professional Grade Electrostatic Sprayer

- ◇ Lightweight and Portable
- ◇ Quiet—Suitable for Use in Any Environment
- ◇ Removable Tank Holds 33.8 Ounces of Liquid
- ◇ Charge On/Off Selector
- ◇ Uses 70% LESS WATER than trigger sprayers
- ◇ Great for Sanitizing, Disinfecting, Odor Control, Insect Control, Pesticide Applications, Cleaning Chemicals and More!

Specifications	Weight : 3.8 Pounds	Particle Size Data
Input Voltage: 120 VAC	Capacity: 33.8 Ounces	Small/Medium/Large
Battery Voltage 16.8 VDC	Flow Rate: 3.35/3.62/4.43 Ounces Per Minute	40 - 100 Microns
Run Time: 4 Hours	Tanks Per Charge: 22/25/31	Optimal Spray Distance: 2-3 Feet

Kit Includes:

- ◇ 16.8 Volt Lithium Ion Battery
- ◇ Base Charging Station
- ◇ Custom Carrying Case
