Denton, Texas 76208

Dear Doug,

Please accept this testimonial with respect to Sterile Clean and Sterile Doctor, which was applied to U.S. Cellular Field.

After 9 months of heavy use, we continue to show very low readings with the ATP meter in the areas that have been treated. Since the application of Sterile Doctor, we continue to have no cases of Staph or MRSA cross contamination. I could not be happier with the product as it's certainly working as advertised.

Given that these areas are high use areas, we are very satisfied with the results that we have seen and would recommend your product to anyone considering this form of long lasting protection for their company or organization.

Sincerely,

A handwritten signature in black ink, appearing to read 'GH'.

Greg Hopwood
Sr. Director of Stadium Operations
Chicago White Sox
